

INNOVATIVE EQUINE ANALYSIS

PRODUCT FOCUS

Racing, Dressage, Eventing, Endurance, Trotting, Jumping

The Pegasus system will give you the stride characteristics of your horse:

- Gait Type (walk, trot, canter, gallop)
- Stride Rate
- Stride Length
- Speed
- Time

The Pegasus system will record up to 6 hours of data on your horse's stride in any of the following places:

- Ménage (open or covered)
- Treadmill
- Overland

See www.etb-pegasus.org for more information

WHAT IS THE PEGASUS SYSTEM?

There are two units (see picture). The Pegasus-G fits at the front of the saddle using a wither pad. Pegasus-S fits on to any other convenient position, and may be carried by a rider. A single button press is all that's needed to start and stop recording on each module, and you can create records of activities throughout the day. When you have finished your training, simply press the button on each unit to stop recording. The supplied Poseidon software is used to send your horse's data to ETB for analysis: they will send you the full details of your horse's stride characteristics.

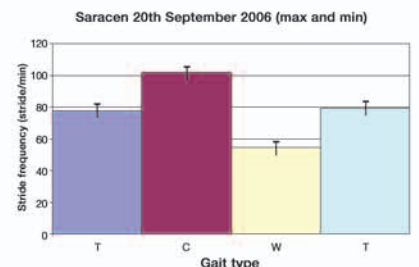

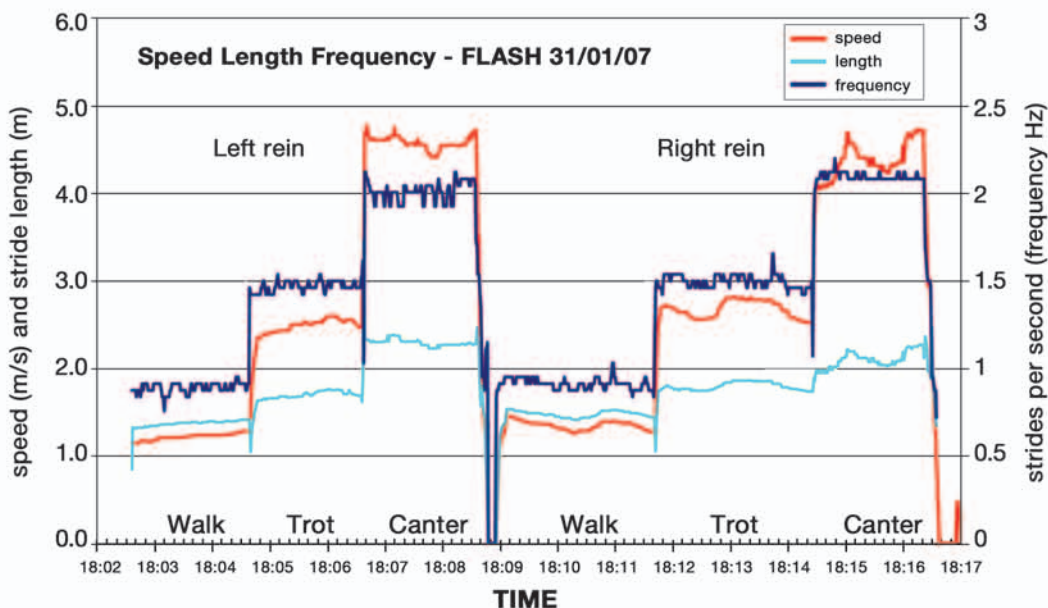

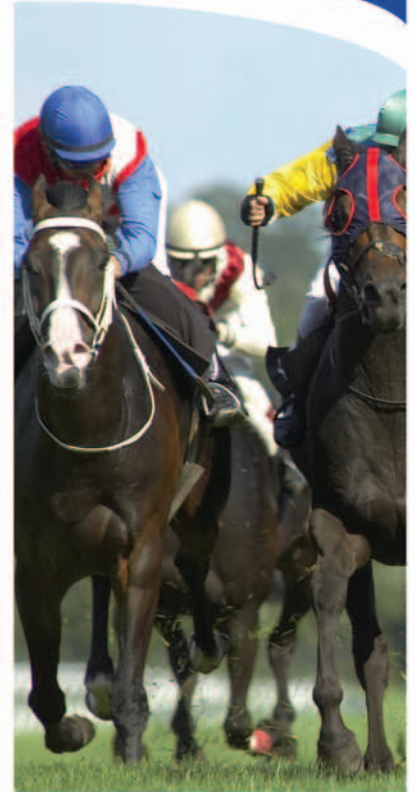

INNOVATIVE EQUINE TRAINING

THE BENEFITS OF PEGASUS:

You will gain a greater understanding of your horse's behaviour, be able to precisely monitor its well being, and be able to measure the effect physiotherapy, diet, shoeing and terrain has on your horse.

- ✓ **Race Horses:** Determine changes in stride length and rate throughout a gallop.
- ✓ **Dressage:** Compare your horse's stride characteristics with equine experts' published information.
- ✓ **Endurance:** Record your horse's gait throughout a complete endurance trial to improve training.
- ✓ **Eventing:** Record the horse's stride characteristics for all the events to determine where improvements can be made.
- ✓ **Trotting:** Monitor the stride frequency and stride length to improve competitiveness.
- ✓ **Jumping:** Ascertain the horse's ability to modify stride length when approaching a jump.

ETB seeks to improve its products, and published material may not always reflect the latest situation. ETB will not be held liable for discrepancies.
